

Environmental certification for Hupac Group

Hupac calculates the CO₂ emissions of transportation volumes. The consignments carried on its intermodal network have reduced the environmental footprint in the amount of:

992'101 t of CO₂

Period From 1 January 2017 to 31 December 2017
Traffic volume 763'101 consignments – 1'370'000 TEUs

Calculation parameters

Cargo weight 20,2 million tonnes

Combinedtransport

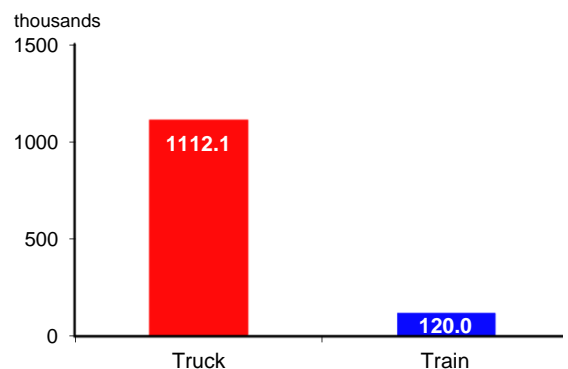

Long train (1500 t), emission standard electrified, load factor 80%, empty trip factor 20%, transhipment

Road transport

Vehicle type 26-40 t, emission standard EURO-V, load factor 60%, empty trip factor 20%
